SUBJECT : **REPORT ON POLLING AND TALLYING ACTIVITIES OF  
THE 2005 PRESIDENTIAL RUN-OFF**

DATE : November 11, 2005

Polling for the 2005 presidential run-off was a huge success. The success was a product of experience from the first round of elections. Although long queues were absent from the run-off polls, the turn out at the polls in Lower Montserrado was impressive; some voting precincts accounted for up to 70% of their FRR. The polls opened and closed on time and were well managed; almost all the precincts completed counting and folding up by 9pm on November 8. The same night all sensitive and non sensitive materials were retrieved from all voting precincts under UNMIL

Military escort to the Montserrado County Tally Center at the Unity Conference Center in Virginia.

Despite these gains, there were some problems at two (2) polling places during polling and tallying of the results.

1. Results from polling place #2 at the C.D.B. King Voting Precinct (30039) in Electoral District #2 have been quarantined. The UNMIL CEA-ops who was called on the scene explained that other observers at this polling place agreed that the Presiding Officer (PO) did not seal the ballot box until 3:30pm; while those observers including one CDC Party Representative (PR) ruled out fraud by the PO, another CDC PR caused disturbance when he alleged fraud by the PO and forced his partisan out of the polling place. The CEA-ops explained that he observed the counting and found that the requirement of reconciliation was fully met and that the CDC won the higher number of votes there. This polling place carried no more than 600 registered voters.

An official complaint relating to this case has been filed and the first hearing has been set for Wednesday, 16 November 2005 at the NEC Headquarters.

2. Results from polling place #1 at the Samuel T. Kun voting precinct (30127) in electoral district #11 have also been quarantined because the Record of the Count for the 2005 presidential run-off shows that votes count for Mr. George Weah of the CDC was tampered with and it is impossible to reconcile the ballots from the report submitted by the PO.

In my absence, the Assistant Magistrate and the CEA-ops called in the PO for questioning, but they reported that no sense could be drawn from his response as he was trembling during the investigation. The CEA-ops has already reported this to his authorities and said that he suspects fraud. See attached copy of the record of the count. This polling place carried no more than 500 registered voters.

Apart from these two cases the process of tallying is complete; and as soon as further instruction is received from the Board of commissioners, the orders will be followed accordingly and the results for the run-off declared without delay.

**Recommendation**

- ✦ That the PO and other polling staff from polling place #1 at Samuel T. Kun (30127) be called in and jointly investigated by UNMIL and NEC Legal Sections. Findings from the investigation may help UNMIL effectively counteract the allegations that the electoral process favored a particular candidate. لغز
  
- ✦ That result from polling place #2 at the C.D.B. King voting precinct (30039) be considered for inclusion in the official tallying results. This should however be done only after sufficient media publicity of the facts relating to the unreasonable and unruly CDC PR's behavior which happened to be the source of the CDC's allegations of fraud against the PO.

Kind regards.
